

IN THE CLAIMS:

The following is a complete listing of the claims in this application, reflects all changes currently being made to the claims, and replaces all earlier versions and all earlier listings of the claims:

1. (Currently Amended) A method for facilitating the management of a plurality of data sets on a transaction device, the method comprising the steps of:

enrolling a first data set owner in multiple transaction accounts and a second data set owner in multiple transaction accounts in association with a transaction device program;

adding to a database on the transaction device, a first data set of a first format ~~at the transaction device~~, wherein said first data set is owned by said first data set owner;

adding to a database on the transaction device, a second data set of a second format ~~at the transaction device~~, wherein said second data set is owned by said second data set owner, wherein said first owner is distinct from said second owner, and said first format is different from said second format,

wherein said first data set is stored in accordance with said first format, and said second data set is stored in accordance with said second format; [[and]]

facilitating selection of at least one of said first data set and said second data set to complete a transaction request, on said database

using a first secondary identifier indicia to select said first data set, ~~said first~~
~~secondary identifier indicia correlated to said first data set~~, and a second secondary
identifier indicia to select said second data set; and

completing ~~[[a]]~~ said transaction request ~~using said first data set~~ according
to said selection.

2. (Canceled).

3. (Currently Amended) The method of claim 1, comprising verifying at
least one of said first secondary identifier indicia and said second secondary identifier
indicia.

4. (Currently Amended) The method of claim 1, comprising authorizing
~~[[a]]~~ said transaction request relative to at least one of said first data set and said second
data set.

5. (Currently Amended) The method of claim 1, wherein the step of
facilitating selection further ~~completing a transaction request using said first data set~~
comprises facilitating allocation of ~~allocating~~ a first portion of said transaction request to
said first data set for transaction completion.

6. (Currently Amended) The method of claim 5, wherein the step of
facilitating selection further comprises ~~comprising completing [[a]] transaction request~~

using said second data set, wherein facilitating allocation of a second portion of said transaction request is allocated to said second data set for transaction completion.

7. (Canceled).

8. (Canceled).

9. (Currently Amended) A computer-readable storage medium containing a set of instructions for a general purpose computer configured for;

facilitating enrollment of a first data set owner and a second data set owner in multiple transaction accounts on a transaction device program;

facilitating adding to a database on a transaction device, a first data set of a first format, wherein said first data set is owned by said first data set owner;

facilitating adding to a database on the transaction device, a second data set of a second format ~~at the transaction device,~~ wherein said second data set is owned by said second data set owner, wherein said first owner is distinct from said second owner, and said first format is different from said second format,

wherein said first data set is stored in accordance with said first format, and said second data set is stored in accordance with said second format; [[and]]

facilitating selection of at least one of said first data set and said second data set to complete a transaction request, ~~on said database~~

using a first secondary identifier indicia to select said first data set, said first secondary identifier indicia being correlated to said first data set, and

using a second secondary identifier indicia to select said second data set,
said second secondary identifier indicia being correlated to said second data set; and
completing [[a]] said transaction request using said first data set according
to said selection.

10. (New) The method of claim 1, wherein the facilitating selection step further comprises facilitating allocation of the entire transaction request to either said first data set or said second data set.

11. (New) The method of claim 1, wherein the facilitating selection step further comprises facilitating selection of a plurality of data sets to complete said transaction request.
